

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

With current and past deruglation we now pay higher fees than in the past, it has to level off some time. You always say more competition will lower the cost for consumers. This has not been the case, with all the sur-charges attached, and not knowing who to contact for service most of the time.

Keep the USF Fair!

Sincerely, Dacid Beach 3434 Roland Avenue Baltimore, MD.
